

This Month: New Third Rack Dishwashers

Introducing the all new Bosch dishwasher collection, featuring 3rd racks across all 300, 500, 800 Series models, adding 30% more loading area without sacrificing it elsewhere.

- Accommodates larger, deeper items like 6" x 2.5" cereal bowls.
- Angled to allow for 9" wine glass in upper rack.
- Fits dinner plates up to 11.5".
- Frees up space below for larger items like stock pots.

Standard 3rd rack

Provides the perfect space for flatware, large utensils, measuring cups, or nearly anything else that's difficult to fit in a traditional dishwasher, while its V shape leaves room below both sides for taller items like stemware in the middle rack. Available on all 300 Series models.

Flexible 3rd rack

Expandable wings easily lower to accommodate more of your deeper items, while adjustable tines let you customize the rack's loading space to fit awkward or bulky utensils. Available on all 500 and 800 Series models.

MyWay™ rack

MyWay™ offers more room for more kinds of items in the top rack, such as cereal bowls, whisks, tongs and large measuring cups, creating more freedom in loading below. Available on all 800 Series Premium models.

New!

EasyGlide™ rack system

For a level of quality you can both touch and feel, we've incorporated smooth-rolling ball bearings to our rack wheels. The result is a smoother glide that opens effortlessly—even with a fully loaded rack—for a more premium feel with every pull.

Rack-mounted detergent tray

Optimized for tablets, our detergent tray holds tabs in place for a dedicated spray jet to directly dissolve them completely. This not only results in a deeper clean, it also helps to reduce unwanted noise since there's no water jet spraying the inner door. (Dishwasher also works with powder and gel.)

Sensor wash system

This state-of-the-art system uses an advanced scanning-eye sensor to literally look at the level of soil in the wash water, and adjusts both the water temperature and length of the wash cycle to eliminate redeposits. It can also determine if a secondary, fresh water fill is necessary, deleting the cycle whenever appropriate to save water and energy.

New!

FlexSpace™ tines

This convenient new feature lets you fold back every other tine in one simple step, so it's easier to fit your largest, bulkiest items. Available on lower racks in 300 Series models and up, it helps to hold pots and pans upright, leaving more room for your other dishes.

RackMatic® adjustable rack

This remarkable middle rack easily raises or lowers in just one step, even when full. Designed to allow taller items like stemware to fit in the middle rack while leaving room for pots and pans below, it offers three different heights and up to nine separate rack positions.

Speed60® cycle*

Enjoy your next dinner party even more knowing our Speed60® cycle can have your glasses and dishes clean and dry in about 60 minutes.

The Quietest dishwasher brand in the U.S.¹

With models as low as 39 dBA, Bosch is the quietest dishwasher brand in the U.S.¹ To reach these new heights of silence, Bosch engineers approached noise reduction from every angle, incorporating 18 unique sound-reducing technologies.

¹Based on an average of sound ratings for 24" full-size stainless steel tub dishwashers contained in major brands' websites. Major brands defined as TraQline Top 5 Market Share, June 2016.

Ultimate drying performance

What is condensation drying?

All Bosch dishwashers use a condensation drying process. Instead of utilizing a heating element at the bottom of a dishwasher, condensation drying involves a number of dishwashing elements that work together to efficiently dry your dishes more hygienically than conventional air drying; and with minimal energy.

Here's how it works:

- The final rinse uses high-temperature water to make the dishes very hot.
- The stainless steel tub of the dishwasher cools faster than your dishes because stainless steel cools faster than glass and porcelain.
- Condensation occurs when the moist air in the dishwasher comes into contact with the cooler stainless steel tub, and turns into water droplets. These water droplets trickle down to the bottom of the dishwasher and are drained.

For best results:

- Always use a liquid rinse aid.
- Select the Auto cycle.
- Press the Sanitize or Extra Dry option.

Benefits:

- Since it's a closed system with no fan, the cleaning process is more sanitary.
- With no exposed heating element, plastic utensils and dishes placed on lower rack will not melt.
